

Amendments to the Specification:

Please add the following two paragraphs after the paragraph beginning on page 7, line 21:

FIGURE 18 is a flow diagram illustrating an example embodiment of a method performed by a first computing device of an information processing system.

FIGURE 19 is a flow diagram illustrating an example embodiment of a method performed by a computing device.

Please add the following two paragraphs after the first full paragraph on page 61.

Figure 18 is a flow diagram illustrating an example embodiment of a method performed by a first computing device of an information processing system, the method comprising, receiving first information (step 1803) that has been formed according to application software instructions, independent of the software instructions, forming second information (step 1805) for causing a second computing device to perform an operation, in response to receiving the first information, executing protocol stack instructions to form a packet including at least the first and second information (step 1807), and outputting the packet to the second computing device (step 1809).

Figure 19 is a flow diagram illustrating an example embodiment of a method performed by a computing device, comprising, receiving a request packet from a client with an existing session (step 1902), selecting a server to process the request (step 1904), when the selected server does not match the server associated with the existing session, migrating the existing session to the selected server (step 1906).
